Patna, Bihar [GitHub: `github.com/piyushkumar`](https://github.com/piyushkumar)

PROFESSIONAL SUMMARY

Data Analytics enthusiast with a BCA background and hands-on experience analyzing real-world datasets using Python, SQL, and Excel. Skilled in writing advanced SQL queries (JOINS, GROUP BY, SubQueries) and building interactive visualizations with Power BI. Passionate about transforming raw data into actionable insights.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript
Data & Analytics	Pandas, NumPy, Matplotlib, Seaborn, Excel (VLOOKUP, Pivot Tables) MySQL,
Databases	PostgreSQL
Visualization	Power BI, Excel Charts, Google Sheets
Frontend	HTML, CSS (basic)
Tools	Git, GitHub, Jupyter Notebook, Figma, Canva, Microsoft Office

PROJECTS

SQL Data Analysis — Hospital Dataset [Link](#) :-

- Completed a 30-day SQL micro-course analyzing 10,000+ real-world hospital records using advanced SQL queries.
- Applied GROUP BY, JOINS, date functions, and subqueries to uncover patient admission trends and a 23% Q4 spike.

Bookstore Sales Analysis — SQL [Link](#) :-

- Designed a relational database schema to manage bookstore inventory, sales, and customer data.
- Used advanced queries (JOIN, GROUP BY, HAVING) to identify top-selling genres and high-value customers.
- Produced business insight reports on monthly revenue trends and stock turnover rates.

Personal Portfolio Website [Link](#) :-

- Built a fully responsive portfolio using React, Vite, and Tailwind CSS with dark/light mode toggle.
- Showcased 4 data-focused projects with dedicated detail pages using React Router; deployed on GitHub Pages.
- Integrated animated loading screen, smooth transitions, and an interactive Dino Game.

US Superstore Sales Dashboard (Power BI) [Link](#) :-

- Built an interactive sales dashboard using Microsoft Power BI to analyze 9,994+ orders and identify key business insights.
- Created DAX measures (Profit Margin, YoY Growth) to uncover trends like discount-driven losses.
- Designed dynamic visuals with KPIs and filters to support data-driven decisions.

COVID-19 Data Analysis Dashboard [Link](#) :-

- Built a 5-page interactive Power BI dashboard analyzing 1M+ COVID-19 records using 7 DAX measures and Power Query to track mortality, ICU admissions and comorbidities.
- Designed KPI cards, donut charts, box plots and a heatmap matrix with cross-filtering slicers synced across all 5 dashboard pages.
- Uncovered key insights: 7.3% mortality rate, elderly patients had highest deaths, and only 1.6% of patients required ICU admission.

EDUCATION

St. Xavier's College of Management & Technology, Patna
Bachelor of Computer Applications (BCA)

2021 – 2024
